

STS ASSOCIATION
Standard Transfer Specification

WINNER OF MOST
PROACTIVE EXHIBITOR

THANK YOU

African Utility Week POWERGEN Africa

We would like to take this opportunity to thank every delegate for visiting our Exhibition Stand D100 at the Enlit Africa 2023 held at the ICC in Cape Town. South Africa from 16-17 May 2023. We appreciate your engagement, participation and feedback on current projects.

We are thrilled and proud to announce that we won the award for **Most Proactive Exhibitor** at this year's conference for our commitment to leveraging the conference's resources to amplify the brand, key messages, exhibition activities and explore accessible touch points. Thank you to Vuka Africa for the recognition.

To the Municipalities and relevant stakeholders, a huge thank you for your participation in the remarkable Municipal Forum and hope that our tenacious presenters and facilitators provided you with sufficient information to commence or successfully complete the **TID Rollover Projects** for your regions.

We would also like to thank the various members and prospect members who engaged our technical team on the **Evolution of STS into Smart Metering**. We certainly look forward to further engagements and being of service to you.

We look forward to connecting with you again at Enlit 2024.

Many Thanks,

STS Association Board of Directors
